Summary

Product-minded technologist working at the intersection of **data, AI, and product design**. Experience building predictive-modeling systems, automated data pipelines, and analytics-driven interfaces, and translating complex technical/AI outputs into decisions non-technical stakeholders can act on. Completed Anthropic/CodePath's **Claude Corps** AI Fluency program. Comfortable owning initiatives end-to-end – from requirements gathering through delivery and measurable outcomes.

Certifications

- **AI Fluency** – Anthropic / CodePath (Claude Corps Prerequisite), 2026
- **Claude 101** – Anthropic / CodePath (Claude Corps Prerequisite), 2026

Experience

Cavin Infotech Private Limited

June 2026 – Present

Immersive Tech Intern

Remote

- Gathering stakeholder requirements and designing the Products page for a full company website redesign, structuring product narratives and CTAs to directly drive lead generation and client call bookings.
- Translated non-technical decision-makers' business goals into conversion-focused, data-informed prototypes, iterating rapidly based on stakeholder feedback and usage signals.

KeyNcoders

July 2025 – October 2025

UI/UX Design Intern

Remote

- Redesigned the company's digital platform end-to-end: wireframes, interactive prototypes, and a cohesive visual system, delivered entirely in Figma.
- Refactored information architecture and optimized key interaction pathways, improving user flow and reducing friction across the platform.
- Applied accessibility standards and modern UI/UX principles to ensure usability and consistency across all interfaces.

Technical & Product Projects

Aether – AI Precision Farming Platform

2026

React, Python, Temporal Fusion Transformer, Figma

- Built the frontend for a farming intelligence platform unifying a **predictive model** (Temporal Fusion Transformer for 7–14 day soil-moisture forecasting), leaf-image disease diagnosis, agroclimatic crop recommendations, and live mandi prices into a single interface – turning four independent ML pipelines into actionable, non-technical decisions.
- Designed district- and crop-level query flows making complex model outputs accessible without any data-science background; live demo runs against the real backend with zero mock data.
- Roadmapped on-device offline inference for mobile to extend reach to low-connectivity users.

CareerBot – Automated Job-Tracking Data Pipeline

2026

Python, Playwright, Telegram API, Google Sheets

- Scoped and shipped independently: a fully automated data pipeline scraping 6 job boards, deduplicating and ranking listings, and delivering top-10 match alerts via a Telegram bot.
- Maintained a self-updating, deduplicated Google Sheets tracker as a reliable, always-current data asset – replacing manual tracking with a 24/7 autonomous system.

CampusPreps – Multi-University Academic Resource Platform

2025

Next.js 15, TypeScript, Tailwind, SQL

- Sole designer and developer; scoped and shipped a centralized platform replacing fragmented WhatsApp groups and Drive links with one hub for PYQs, notes, and curated content.
- Built 20+ modular components on a white-label architecture, enabling any university to deploy with minimal configuration – designed for scale from day one.

Aletheia (The Demyst Times) – AI Misinformation Detection

2025

React, Vite, TypeScript

- Built an AI platform delivering real-time credibility scoring and bias analysis across 5 articles simultaneously, with role-differentiated experiences for general readers and journalists.

- Designed UI/UX translating complex AI outputs – bias detection, manipulative-technique tagging – into insights legible to non-technical audiences.

Leadership

Google Developer Groups on Campus, VIT Chennai

June 2025 – Present

UI/UX Design Lead

Chennai, TN

- Promoted to Design Lead after 2 years of contributions; led end-to-end design for 3 major event websites, including the DevsHouse national hackathon site (1000+ participants, 50+ colleges), achieving 25% higher registrations and a 4.8/5 user satisfaction score.
- Ran a 6-hour Figma workshop for 100+ participants, designing curriculum and adapting delivery in real time for mixed technical and non-technical attendees.
- Mentored 10+ junior designers with a deliberate knowledge-transfer goal – turning them into the go-to design voices on their own teams.

Education

Vellore Institute of Technology, Chennai

Aug 2023 – Present

B.Tech in Computer Science Engineering (AI & Robotics) – CGPA: 8.58

Chennai, TN

Sardar Patel Public School, Bhopal

2023

Class 12th – 85%

Bhopal, MP

Technical Skills

- **Languages:** Python, JavaScript, TypeScript, SQL, C, C++, Java
- **Data, AI & Automation:** Predictive Modeling (Temporal Fusion Transformers), LLM API Integration, Image Classification, Data Pipeline Automation, Playwright
- **Product & Design:** Figma, Next.js, React, Tailwind CSS, Adobe Photoshop, Illustrator
- **Tools & Platforms:** Microsoft SQL Server, Git, Vercel, Notion
- **Domains:** Agritech, EdTech, Civic Tech, Media Literacy
